

INTENSIVE INDIVIDUALIZED TRANSITION SERVICES (IITS)

IITS provides clinical case management to help people with intellectual and developmental disabilities and complex mental illness/substance use disorders transition from institutional settings to community-based living.

SERVICES INCLUDE:

- Risk assessments
- Developing person-centered plans, positive behavior support, and enhanced services
- Recommendations to planning teams including nursing, medical, and psychiatric services
- Therapeutic interventions
- Environmental assessments, including a plan for health and safety
- Community linkages and partnerships

IITS is available to adults identified by Regional Centers in California. Participants must be transitioning or have transitioned from Porterville Developmental Center to a Step-Down home or community-based living environment.
