

# PREMIER HEALTHCARE COVID-19 TESTING

**We now offer rapid Antigen and PCR testing for COVID-19 and antibody testing at our five clinics in the Bronx, Brooklyn, Manhattan, and Queens. Our Manhattan clinic is open Saturdays from 9 am to 2 pm exclusively for COVID testing.**

**There are no out-of-pocket expenses. Appointments are required, and same-day appointments are available.**

**What is COVID-19 antibody test?**

## **Antigen (Rapid) Test**

This test produces results in 15 minutes. Available at all Premier clinics, the rapid antigen test detects fragments of proteins found on or within the virus by testing samples collected through a nasal swab. A positive test shows an active COVID-19 infection.

If additional testing is needed, a PCR test will be conducted, and results will be delivered within 72 hours.

## **PCR Tests**

The PCR test is also administered through a nasal swab and the results are available within 24 to 72 hours. This test detects the presence of the virus's genetic material to find active COVID-19 infections.

## **Antibody Tests**

Antibody tests detect previous COVID-19 infections. This test looks for antibodies, which are specific proteins made in response to infections. It is administered by drawing blood from a vein in the arm. Antibodies can be found in the blood of someone after infection and show if the person has had an immune response to the infection.

**Premier HealthCare staff are tested routinely for COVID-19 to ensure that providers and administrative professionals are healthy, minimizing risk for all.**

**Most insurance is accepted.**

**Call 212.273.6272 to book your appointment today.**
